

Dynumatic®

Manufacturers of Eddy Current Variable Speed Drives And Controllers for the

Aggregate/Asphalt Industry

Re-manufactured Drives and Controllers Complete with Factory Warranty

Dynamatic® Aggregate/Asphalt duty drives and controllers are used with:

- Cold Feed Conveyors
- AC Pallet Pumps
- Incline Conveyors
- Vibratory Feeders
- Crushers

**The DCD Drive is a low cost
solution and drop in replacement
for many competitors units such
as “TCD” and “CD” drives**

**Application Engineering
Quality Products
Total Solution**

Worldwide Sales, Service and Support

- Eddy Current variable speed drives, brakes and controllers up to 3,000 HP
- 250% starting torque
- Drop in replacement units and parts for all Eddy Current drives
- Mark III, 3000, 4000, 4050, DSI 700 and EC 2000 Eddy Current controllers
- Custom engineered controllers up to 100 amps - DC output
- Custom drive control systems
- Functional replacements for older Eaton Dynamatic Eddy Current drives
- 24-hour emergency service
- Applications engineering and start up support
- Printed circuit board analysis and repair
- Eaton Dynamatic factory original drawings and specifications
- New Eddy Current digital controllers to replace older obsolete analog Eddy Current units
- Factory re-manufactured Eddy Current drives and digital controllers
